

# Bringing the Field to the Room: EMW Sanitation - Cambodia

Kim Hor | 13 July 2016

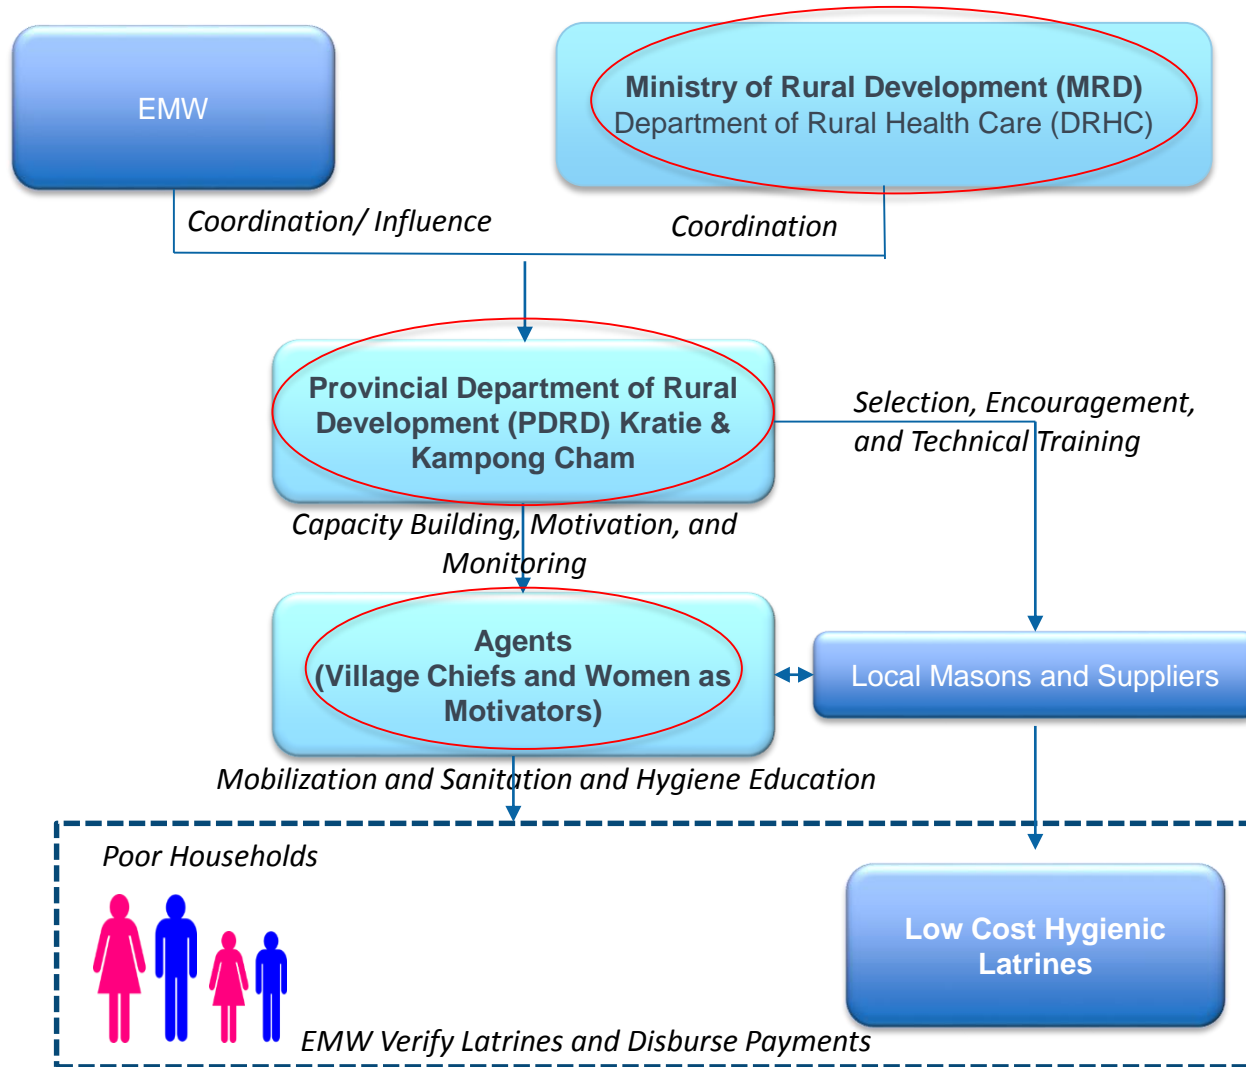

# Water, Sanitation and Hygiene Output-Based Aid (WASHOBA)

**Main project objective:** demonstrate to the government cost-effective approaches to deliver sanitation services, especially to the rural poor.

# Project Provinces

# Who do you liaise with to arrange a visit?

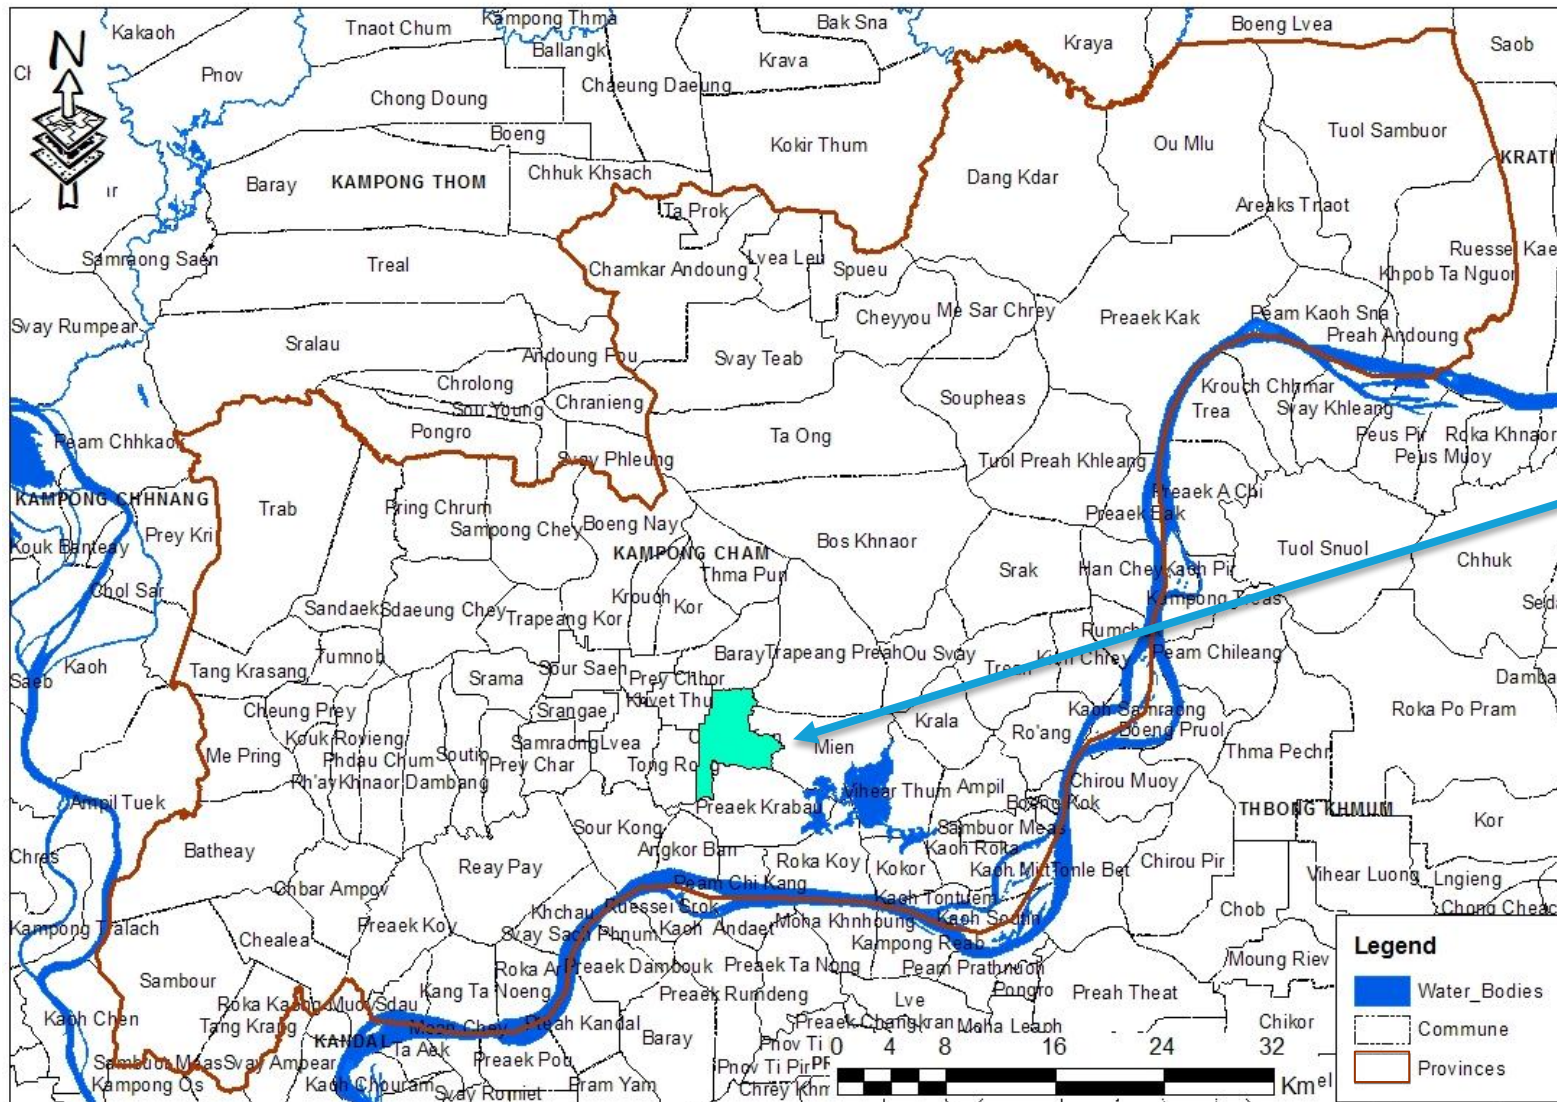

# Who greets you when you arrive?

## Provincial Department of Rural Development

# Project location: Kampong Cham Province

Chrey Vien  
Commune

# How do you get there?

# What do you see/inspect on a site visit?

## Visiting supplier

Verify quality of latrine materials

# Who do you meet on a site visit?

- Provincial Department of Rural Development (PDRD)
- Health sector staff (Preventative Medicine Centre)
- Village chief/mobiliser
- Latrine Masons/Suppliers
- EMW volunteers

# What do you do on a site visit?

## Participating in village triggering at Vet Thom Village

IV Bunthoeun, EMW Staff, Mr. Ratanak Suy, PDRD staff, and Mr Linny Khuoch, Deputy Director of Department of Rural Health Care

# Village Triggering - Key Messages

## Key messages

1. Means of water-borne and fecal related spread of disease... and how to prevent it
2. Impact of not having proper sanitation and clean water on health, community and the household's finances
3. Hygiene promotion
4. Introduction of low cost latrine

# Household Visits

Inspect latrine installation at poor households

# Any particular challenges facing the project in this location?

Severe drought in 2016 affected poor families economic situation

No other unique challenges in this area but typical program challenges include:

- Migration to find work outside of the village -> lack of awareness about the program
- Lack of labor for construction
- Less participation of men in village meetings - 80% of participants are women which effects HH decision making on latrine construction as women need to discuss with their husbands.

# Success to Highlight: Over achieving sanitation targeted and implementing an additional 1000 latrines
