

From Field to the Room

Community and School Water, Sanitation and Hygiene
Promotion Project (CS-WASHPro) – Plan Vietnam

Nguyen Quy Hoa | Vu Thuy Anh| July 2016

Project title: Community and School Water, Sanitation and Hygiene Promotion Project (CS-WASHPro)

Project objectives (Theory of change)

Change agents

- Effective government knowledge, skills and commitment at district and commune level to achieve sustainable WASH improvements for communities.

Impacts

- Improved WASH behaviours at the household level, with a focus on hand washing with soap, using toilets and drinking safe water.
- Increased access to sanitation infrastructure for households and schools

Project locations

CS-WASHPro project is being implemented in 05 rural & mountainous districts of 03 provinces:

- Quang Binh (*Minh Hoa district*);
- Quang Tri (*Huong Hoa, Dak Rong districts*); and
- Kon Tum (*Kon Plong and Kon Ray districts*)

Place to visit

Kon Ray, Kon Plong, districts of Kon Tum province

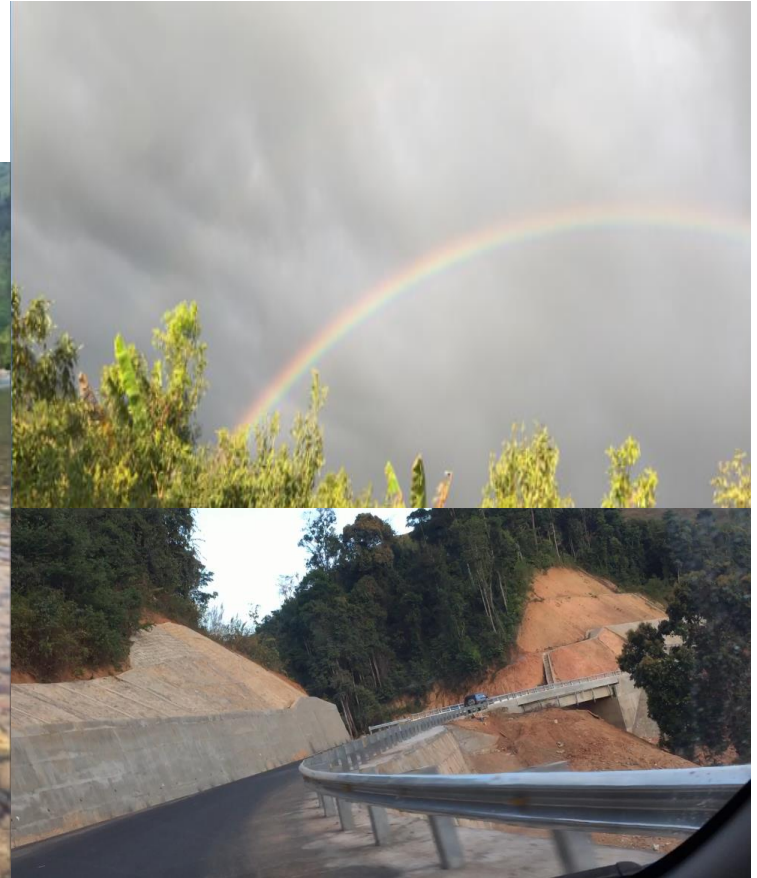

Who do you liaise with to arrange a visit?

Plan VNM – PU based in Măng Đen

How do you get there?

First by air, then
car and walk

CIVIL SOCIETY
WATER, SANITATION
AND HYGIENE FUND

Who greets you when you arrive?

What do you see/inspect on a site visit?

Slogan on safe water and hygienic toilet

What do you see/inspect on a site visit?

HH Tap water and clean toilet

What do you see/inspect on a site visit?

HH toilet making

What do you see/inspect on a site visit?

Village masons

Who do you meet on a site visit?

PIC of Kon Plong district

Children and HWWS

What do you do on a site visit?

Attend training on HWTS

Attend training on
Making toilets

What do you do on a site visit?

Show: making HWWS facility

What do you do on a site visit?

Quang Tri-CLTS triggering

https://www.youtube.com/watch?v=QJFUFceZ_Dk&feature=youtu.be

HWWS in pre-school

What do you do on a site visit?

Quang Tri - Villagers in Ta Rung village repairs WSS intake structure

Intake structure in operation and visitors

Challenges facing the project

Sanitation is still not a HH priority.
Unhygienic toilets are still popular

Surrounding environment with
animal waste

Particular successes to highlight to visitors

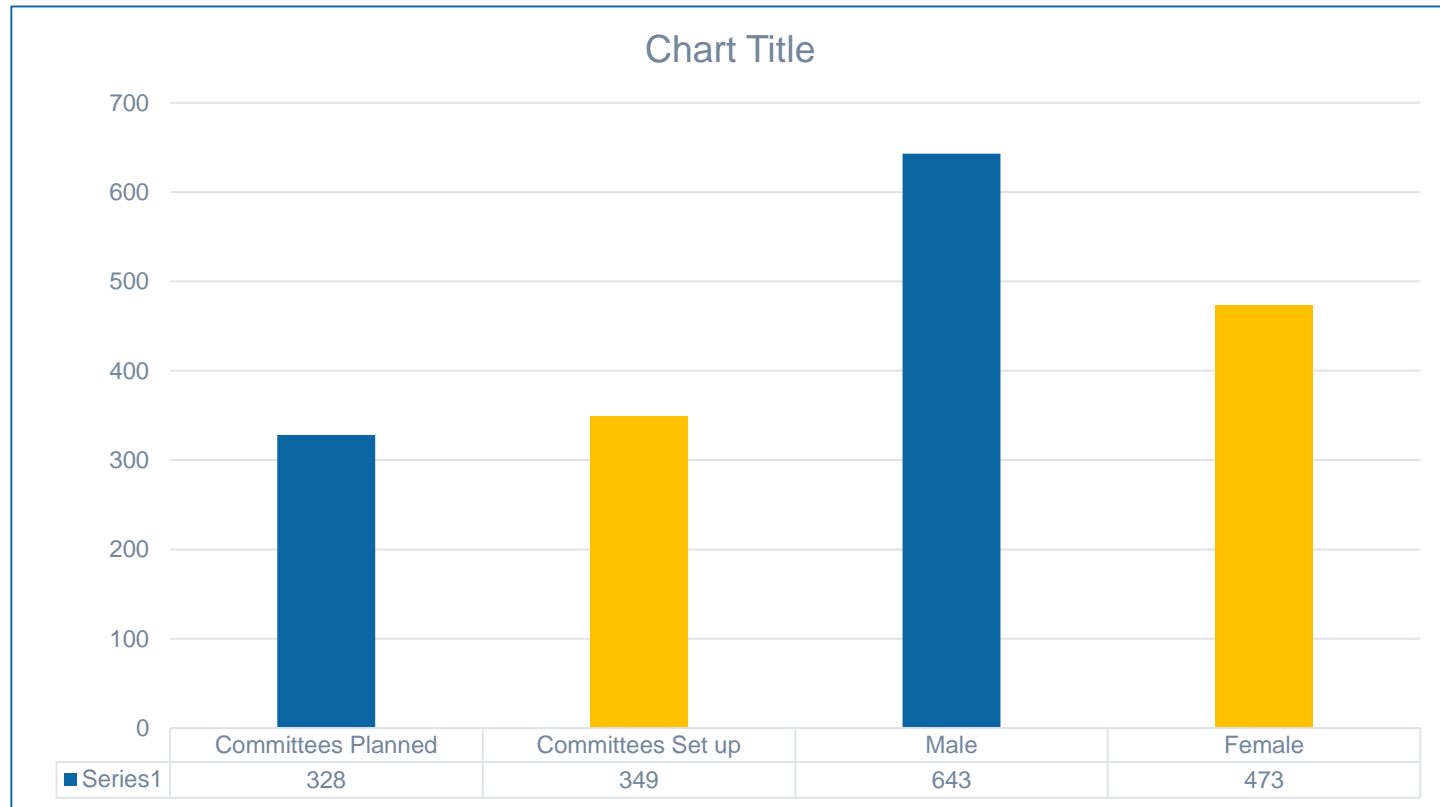

Making mold from composite material

Making Cheap mold from GI material and on-site production of concrete rings to help reduce the cost of toilet building

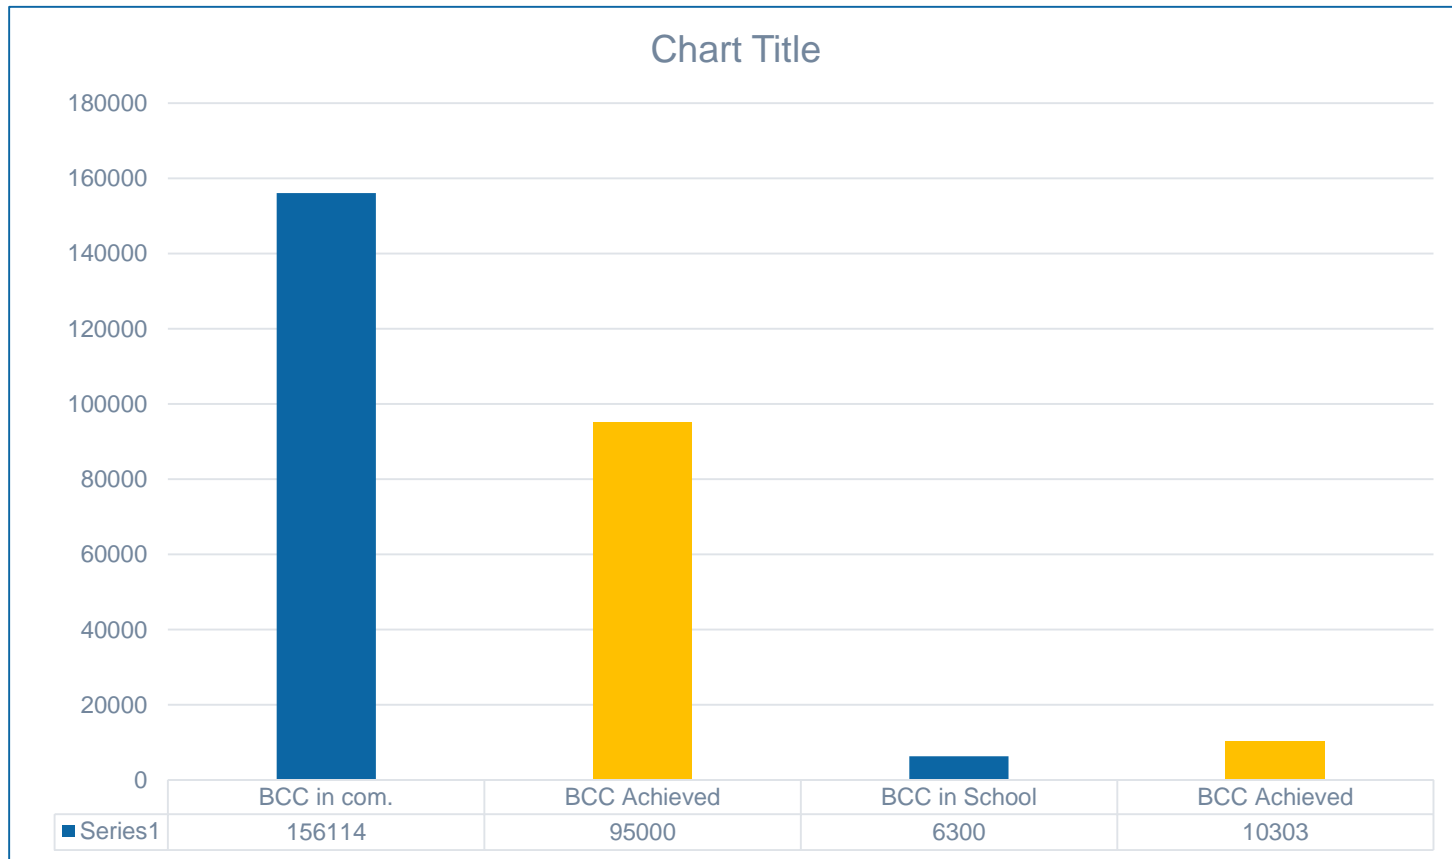

Project progress

1. Improved performance of actors in the WASH enabling environment

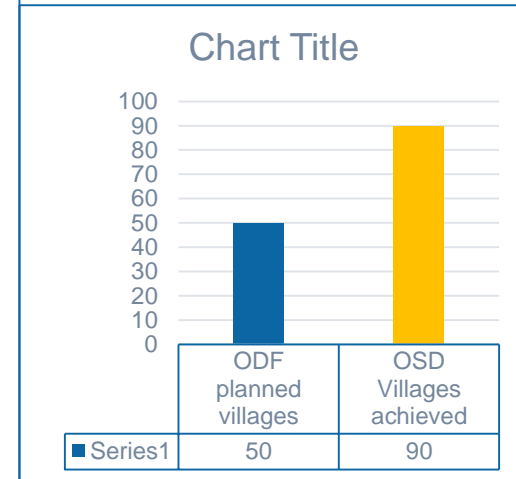

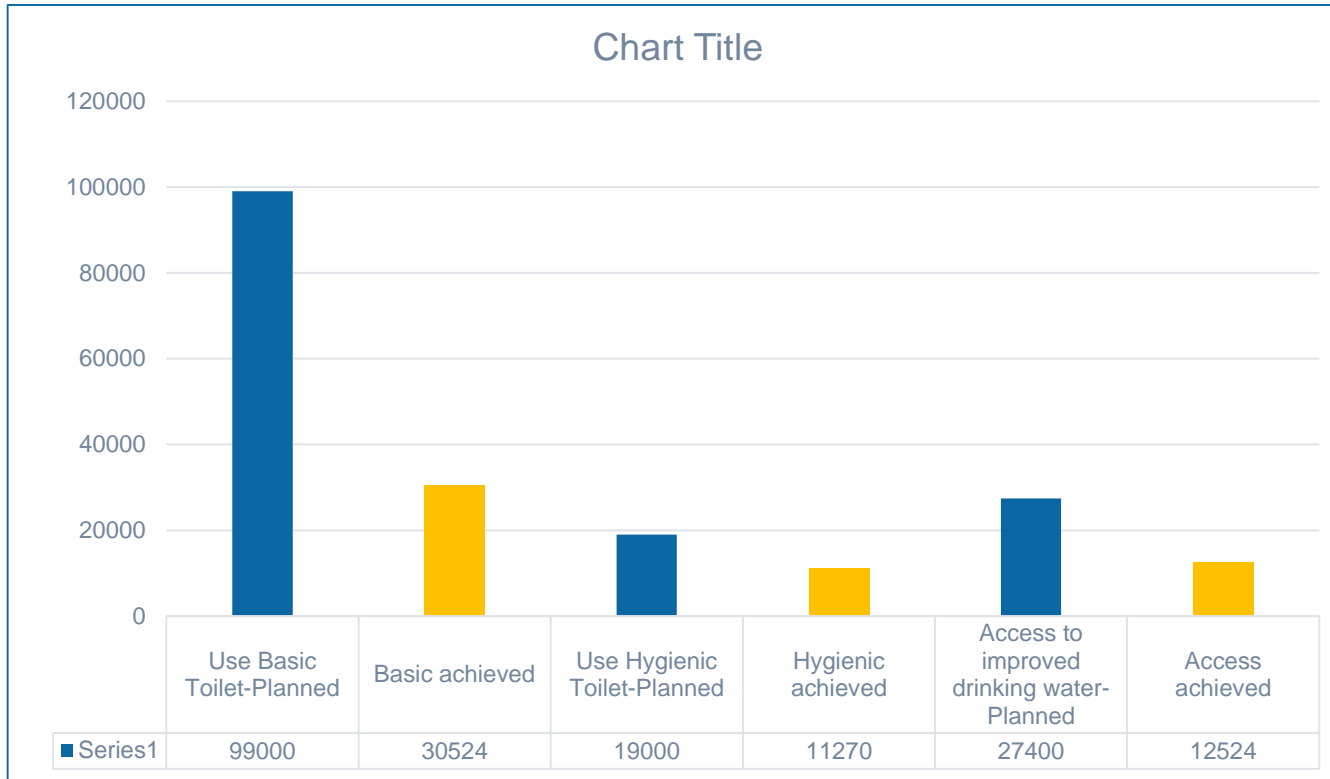

Project progress

2. Improved in hygiene behavior

Project progress

3. Increased use of equitable sanitation services

Project progress

4. Central Women Union with support from Plan VNM:

Pilot the application of Gender WASH Monitoring Tool and Low Cost Sanitation Options in 6 selected provinces

Results:

- ❑ 23 WU staff and 5 masons of the Central and 6 provinces attended training on GWMT, Low Cost Sanitation Options and approaches to involve local community participation to reduce the cost.
- ❑ PRA sessions on GWMT conducted with participation from 10 villages
- ❑ 20 sample low cost toilets were made under WU supervision for show to the community people
- ❑ WU links to support 75 HH to borrow 600 Mil VNM from provincial water revolving fund for making HH toilets (in Nghe An), with 0.6% interest rate

Project progress

PRA session on Gender WASH Monitoring Tool in Minh Hoa Quang Binh

Project progress

5. Thinking to improve Sanitation M&E system to serve monitoring the Country ODF Achievement by 2025

Plan VNM introduced to VIHEMA, UNICEF and NGOs at the National Sanitation Working Group Meeting:

- ❑ The WEB based WASH program indicators monitoring system (PIMS) that had been developed and used since 2011, with Vietnam GIS MAP merged
- ❑ Mobile Application, using mobile phone for field data collection that have been developed and piloted in 2015
